An interview was conducted between the undersigned and Examiner Moore on April 24, 2006.

Independent claims 121 and 125 was discussed. The interview was limited to Applicant's emphasis of the arguments presented in its last-filed response. The undersigned emphasized that none of the art of record disclosed the claim-recited load bearing plugs at least some of which have some outer longitudinal surface portion which is straight linear along an entirety of length of said load bearing plugs. The Examiner indicated that, since such were new limitations, such hadn't been considered previously by

the Examiner, and would be considered in light of the existing art and an updated search.

Respectfully submitted,
